WHAT IS E5P?

Eastern Europe Energy Efficiency and Environment Partnership

The E5P is a EUR 243 million multi-donor Fund initiated during the Swedish Presidency of the European Union in 2009. The purpose of the Fund is to encourage municipal investments in the Eastern Partnership region to boost energy efficiency and improve the environment, whilst promoting reforms and policy dialogue. The E5P pools together donor funds from the European Union, as the largest Contributor, and a group of 24 countries. The recipient countries of Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine are also Contributors to E5P.

FINANCIAL RESOURCES OF E5P

GOVERNANCE STRUCTURE

The Assembly of Contributors is the main governing body which approves grant allocations to projects and deals with governance issues. The European Union chairs the Assembly as the largest Contributor. The Steering Group meets throughout the year to review progress and to recommend grant allocations to projects for the Assembly's approval. The EBRD acts as the Fund Manager on behalf of all the Contributors and the participating Implementing Agencies: CEB, EBRD, EIB, KFW, NEFCO, NIB and WB.

SECTORS AND BENEFITS

E5P provides grants as loan co-financing typically for the following municipal sector projects:

- + Energy efficiency in public buildings (schools, kindergartens, hospitals)
 - + Energy saving measures in residential housing
 - + Renewable energy (including biomass)
- + District heating modernisation
 - + Street lighting
 - + Solid waste management
 - + Urban transport
 - + Water and wastewater treatment

Benefits of E5P projects:

 EUR 1,244 million in overall investments	 42 investment projects	 1,000,000 tonnes of CO ₂ reductions per year	 815,700 MWH saved energy per year
 Over 12 million people benefited from projects	 Sector reforms and policy dialogue	 Social and gender benefits	 Corporate development of client companies
	 Substantial gas, electricity and water savings	 Job creation
